DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3-9, 11, 13, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1, lines 3 and 5, the recitation of "in each case" is not readily understood. What is meant by "in each case"?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Insofar as understood, claims 1, 3, 4, 8, 11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Canadian reference #2,299,696 to Leduc et al. Leduc et al discloses a shaft base body 12 that is adapted to be connected to several pipes (not shown). The shaft base body comprising a central connection section 16 that is capable of connecting to an inspection and flushing shaft (not shown). The shaft base body appears to have external corrugations and a cylindrical inner pipe section. Furthermore, the shaft base body is adapted to be connected to pipes having different diameters, such as an inspection shaft having a smaller diameter.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Canadian reference #2,299,696 to Leduc et al in view of Hegler #6,044,591. Leduc disclose all that is claimed except for the at least one connection element for a sewage pipe. Hegler, at col. 3, lines 1-20, discloses the provision of at least one connection element 7, 7', 7" for the connection of a sewage pipe. It would have been obvious to one of ordinary skill in the art to have provided at least one connection element as taught by Hegler, since doing so would have increased flow or capacity of the sewer system.

Allowable Subject Matter

8. Claims 5, 7, and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
